a. PACKAGING: All electric, electronic, and non-electric detonators, non-electric detonator assemblies detonators for ammunition, detonating fuzes, and igniting fuzes must be packaged according to any special packaging instructions stated in the corresponding DOT explosive classification approvals. When no packaging instruction is stated in an approval, the explosives must be packaged according to the Packaging Instruction given for the UN identification number in the § 173.62(c) Table.

b. When Class 1 explosives other than the electric, electronic, or non-electric detonators, detonators for ammunition, detonating fuzes, igniting fuzes, or non-electric detonator assemblies are transported in a cargo van trailer attached to a motorized tractor unit, the detonators and/or detonator assemblies must be isolated from them in a rugged,

crush-resistant locked and sealed metal or reinforced fiberglass cargo-carrying compartment (a.k.a. "dromedary box") located immediately behind the cab of the tractor unit.

- c. When Class 1 explosives other than the electric, electronic, or non-electric detonators, detonators for ammunition, detonating fuzes, igniting fuzes, or non-electric detonator assemblies are transported in an integrated (a.k.a. "straight") truck cargo compartment, the detonators and/or detonator assemblies must be isolated from the Class 1 material in a rugged, crush-resistant locked and sealed metal or reinforced fiberglass cargo-carrying compartment (a.k.a. "dromedary box") securely affixed to a towed trailer or a van-type trailer attached by a fifth-wheel, or other standard securing system, properly engineered to prevent unstable towing conditions.
